MANUAL OPERATION

Emergency manual controls are to be used to operate the lift in case of power supply failure.

They are not intended for 'normal' use as an alternative to powered operation.

DEPLOY/DOWN

On the hydraulic unit, turn manual override valve counterclockwise (Max 1/4 turn)
Lower lift using black knob.

The platform will open and descend until making contact with the ground or if the lowering valve is closed (by turning the knob clockwise).

IMPORTANT

Before any other operation, close the lowering valve, by turning its knob clockwise.

DOT—PUBLIC USE LIFT

UP/STOW

Tighten the lever into the threaded hole. (inside the vertical slot marked by the relevant label)

Operate the pump manually alternating up / down vertical movements.

The platform will reach vehicle floor level to allow user on / off the platform. Continue to operate the pump to stow the platform.
