

## Rear Door Opener™ (RDO) & Hatch Door Opener™ (HDO)

Works alongside the Mobility Networks App  
Click here to find out more!

The mobilityRDO™ is an electrically operated rear door opener, which is used in conjunction with the 2021 Generation iCLASS™ range. The system is designed to be a “plug and play” system making it easy to mount, connect and use, thus saving man-hours. The HDO uses the same components but opens vertically.

### Features

- Magnetic switches (non-mechanical and no hydraulics).
- Two motors
- Wireless remote control
- Easily adjustable moving arm
- Tested for over 10.000 cycles to ensure durability!
